## Global Economy & The Future

### About us

The Technology is likely to have the greatest impact on the future of the world economy has arrived, and it's not self-driving cars, solar energy, or artificial intelligence. It's called the blockchain. Given the promise and peril of such a disruptive technology, many firms in the financial industry, from banks and insurers to audit and professional service firms, are investing in blockchain solutions. What is driving this deluge of money and interest? Most firms cite opportunities to reduce friction and costs. After all, most financial intermediaries themselves rely on a dizzying, complex, and costly array of intermediaries to run their own operations. Santander, a European bank, put the potential savings at \$20 billion a year. Capgemini, a consultancy, estimates that consumers could save up to \$16 billion in banking and insurance fees each year through blockchain-based applications.

## Forex ( Foreign Exchange)

The traditional way in which entrepreneurs and investors have worked in the internet forex market is different from the currency of one country. It is a huge network where the currency of the country is traded.

Forex (Foreign Exchange)

- The forex market is the largest financial market. Around \$7 trillion is exchanged every day globally.
- This is more than three times the sum of American stocks and the government bond market.
- It has been a derivative market for more than 20 years.

The trades in the international market add up to \$6 trillion a day.

# What is Forex Trading?
